### Clyde Caceres Joins RESET as RIPR Program Manager

Simi Valley, California- RESET is pleased to announce the newest addition to their expanding company. Clyde Caceres has joined RESET as the Program Manager for the RIPR project. The RIPR (Rifle Integrated Power Rail) is the first working product that brings centralized power to the upper rail of a carbine or rifle platform.

"We are pleased with the advances RIPR is making within the firearms industry and we are eager to meet with NATO and the United States Army. Clyde Caceres has brought his knowledge of the industry to work for RESET and we could not be more pleased," Galen Puccini, Chief Operating Officer of RESET explains.

"RIPR is a very exciting project and truly brings solutions to the weight, size, balance and battery logistic issues that continue to create issues for both weapon platforms as well as powering the soldier, says Caceres. The RIPR is making advances much faster than expected. The US Army is eagerly scheduling meetings and briefings with RESET and the RIPR brand. The Army finds that SWAP-C (size, weight, performance and cost), are on the top of their list for soldiers. RIPR recently presented to NATO in Stockholm through a USMC invitation.

Clyde Caceres' other business interests include Critical Safety Equipment, LLC ([www.CriticalSafetyEquipment.com](http://www.CriticalSafetyEquipment.com)); CSE provides solution driven equipment to the Law Enforcement, Military and Security market, MSE Worldwide LLC manufacturer of the Life-Jacket™ gun securing case Seeker™ metal detectors and, Restraints Inc. manufacturer of innovative, restraining products for Law Enforcement and the Corrections field.

Previously Caceres worked as the President of First Light USA where he maintained executive planning for the new company with an emphasis on brand building. As the Vice President and an original member of the founding team of Crimson Trace Corporation, Caceres' role included many aspects of company operations from product development to marketing. With numerous certificates of completion in many firearms industry courses as well as professional courses in management and sales, Caceres has a detailed background in the industry. When not working on the RIPR project as well as his other business endeavors, Caceres can be found working on his property in North Florida, traveling, or participating in shooting sports.

For more information on Clyde Caceres, Critical Safety Equipment or the RIPR System please call Clyde at 850.368.6549 or by email at [clydecaceres@gmail.com](mailto:clydecaceres@gmail.com).
